Message from the Guest Editors

Dear Colleagues,

The 11th International Congress on Engineered Material Platforms for Novel Wave Phenomena—Metamaterials' 2017 will be held in Marseille, France from 28 August–2 September 2017. From its first edition in 2007, the Metamaterials Congress has established itself as one of the most important forums worldwide for the engineering, physics, applied mathematics, and material science communities to share and discuss the latest results regarding artificially engineered materials and their applications in different fields.

To continue this exchange of ideas and visions beyond the actual Congress, we are glad to invite you to contribute to a Special Issue in *Materials*. This Special Issue will contain a selection of papers that derive their contents from either oral or poster presentations at the Metamaterials' 2017 Congress. This Special Issue aims to provide a timely and broad collection of the topics discussed at the Congress.

Prof. Carsten Rockstuhl
Dr. Alessio Monti
Prof. Francesco Monticone
Dr. Davide Ramaccia

Author Benefits

Open Access: free for readers, with publishing fees paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Compendex (EI) and other databases. For more information on the journal's Impact Factor, see here.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 22 days after submission; acceptance to publication is undertaken in 7 days (median values for papers published in this journal in 2016).
